Odell Blackmon, III

800 Seneca Street Seattle, Washington 98101

📞 404-860-7166 ✉ odellblackmoniii@gmail.com in linkedin.com/in/odell-blackmon-iii ⃝ github.com/OdellBIII

Education

Carnegie Mellon University	**Aug. 2018 – May 2022**
Bachelor of Science in Computer Science	*Pittsburgh, Pennsylvania*

Relevant Coursework

- Algorithms & Data Structures
- Parallel Analysis
- Functional Programming
- Computer Systems
- Parallel Computing
- Data Science
- Machine Learning
- Computer Architecture
- Cybersecurity

Experience

Oracle Cloud Infrastructure	**July 2022 – Present**
Software Engineer	*Seattle, Washington*

- Added a feature that sped up instance launch times by 60%
- Created a log rotation strategy on Linux to improve the memory management and performance of hypervisors
- Extended an internal tool using Java and Javascript to help increase on call engineer productivity
- Investigated and remediated a widespread NVMe Drive issue using Java

Oracle Cloud Infrastructure	**May 2021 – August 2021**
Software Engineer Intern	*Remote*

- Reduced downtime for hot plugging CPUs on virtual machines using QEMU from seconds to milliseconds
- Designed and implemented a REST API endpoint for ease of CPU hot plugging using Java
- Resolved multiple code remediations to ensure the security of the code base

VMWare	**May 2020 – August 2020**
Software Engineer Intern	*Remote*

- Constructed a potential IoT device classification system in Python that was incorporated into Nyansa's product
- Leveraged ElasticSearch, Python, and Ruby to classify potential IoT devices on Nyansa monitored networks
- Automated IoT device rule creation by creating benchmarks for what makes a good IoT cluster

Projects

Apple Music Playlist Converter | *HTML, CSS, Javascript, NodeJS, Redis, Docker, Heroku*	**August 2023**

- Built a website that converts Apple Music Playlists to Spotify playlists
- Leveraged HTML, CSS, and Javascript for the front end interface
- Deployed a backend service using NodeJS, Redis, Docker, and Heroku

Email 2FA Chrome Extension | *HTML, CSS, Javascript, NodeJS, Redis*	**July 2022**

- Developed a Google Chrome Extension which forwards email 2FA codes to users
- Leveraged HTML, CSS, and Javascript for the front end interface
- Deployed a backend service using NodeJS, Redis, and Chrome Extension API

Ethereum Charity Decentralized Application | *Solidity, Truffle, Javascript*	**December 2021**

- Created an Ethereum smart contract on the Ropsten test network which functioned as a decentralized charity
- Designed a web interface using HTML, CSS, and Javascript and hosted it on Heroku
- Developed the smart contract using Solidity and tested it using Truffle

Reddit to Video Converter | *Selenium, Python, NodeJS*	**December 2021**

- Developed an automation tool which scrapes a subreddit for its most popular post and then converts it to a video with voiceover audio
- Utilized Selenium for web scraping and navigation
- Parsed web data and assembled the video with NodeJS and Python

Technical Skills

Languages: Python, Java, C/C++/C#, HTML/CSS, JavaScript, Solidity, SQL, Bash
Developer Tools: Jira, Github, VS Code, Intellij, Vim, AWS, Google Cloud Platform, Heroku, DigitalOcean
Technologies/Frameworks: Maven, React, Linux, Docker, Git, WordPress, Selenium, Truffle
